

*Merci Asset Tracking and Loan System* is developed to facilitate the management of assets, such as computers, printers, routers ... etc, in a company.  
It consists mainly of 3 parts: *Microsoft Access Software, Barcode Label, and PDA Barcode Scanner.*

## 1. Microsoft Access Software

We will convert all your existing data into the database.

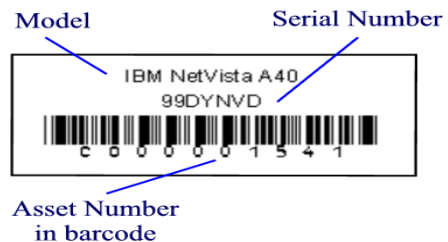

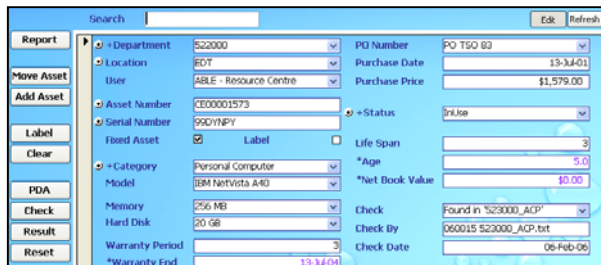

And teach you everything you need to know about the software.

The Loan feature is going to replace your physical loan log book.

## 2. Barcode Label

We will show you how to print barcode label directly from the database. Then, paste it on the assets such as computers, printers, ... etc.

You can also decide what information you want to be printed on the label.

*“...keeping track of 3000 assets is more manageable now ...  
... performing Asset Check with a PDA barcode scanner definitely save a lot of time ...  
... generating reports and search data is fast and easy to use ...  
... no more duplicated asset number ...  
... software can be installed in any PC in my company ...  
... tracking loan-out items such as projector, notebook is easier now ...”*

*... download – unzip – double click to start using the Asset Tracking Software ...  
... we go all out to relieve your burden ...*

## 3. PDA Barcode Scanner

During an asset check, you will carry the mobile PDA barcode scanner around to capture barcode label information. The information scanned is updated to the database with just one click.

## Features

1. Software customization
2. Mobile PDA barcode scanner
3. Barcode label printing
4. Standard and Adhoc reports
5. Standalone or Network
6. Filter and search engine
7. Warranty period monitoring
8. Net book value calculation
9. Duplicated asset number or serial number protection

## Benefits

### 1. Loan feature

It helps you to track item loan-out such as projector, notebook ... etc . All transactions are captured in a soft-copy log book.

### 2. Software Customization

We adapt our software to your needs, making your life easier. And our charges are definitely below market price.

### 3. No license limitation

You can access the software in any computer in your company. Why? Because we don't charge you additional license fee, as long as the workstation has Microsoft Access in it.

### 4. Training package

Have no time to learn how to use the software ?

Don't worry, it is our job to teach you all you need to know.

### 5. Efficient asset check

During an asset check, you will carry the mobile PDA barcode scanner around to capture barcode label information. Then, updated to the database with just one click.

### 6. Printing of barcode labels

You can print barcode labels directly from the software.

## System Requirements

1. Pentium III or higher
2. 128Mb RAM, 50Mb free hard disk space per site/database
3. USB port
4. Windows ME, 2000 or XP
5. Microsoft Access 2000, 2002 or 2003

### 7. Standard and adhoc reports available

You can generate standard or adhoc reports easily, without the need to know complicated SQL.

### 8. Standalone and network versions available

The network version is available if you want to have different users with different access rights to the software.

### 9. Search and filter feature available

These let you narrow down and search for assets efficiently.

### 10. Monitoring of warranty period

You don't have to calculate the date to find out if your asset is still under warranty. The software will monitor the warranty period for you.

### 11. Calculation of Net Book Value

You don't have to calculate the net book value of your assets. The software calculates the net book value real time for you.

### 12. Prevention of duplicate 'asset number' or 'serial number'

You will never have to deal with duplicate 'asset numbers' or 'serial numbers' again. Why? Because it is impossible for you to create one.
